Q: Added a name to Access List, but it's not allowing the avatar access.

This information is for items with a separate Access List notecard inside the object.

If Access List is not working:

- o **Do not remove the first line of access list.** The script expects that line to be there.
~You can however replace existing names on list.

- o **Always use classic Second Life Legacy Names:** *Firstname Lastname*
~Use "Resident" as lastname for avatars with only one name.
~DO NOT use Display Names.
Use [this script](#) to learn your exact Legacy Name.

- o **Names are CaSe SeNsItIvE and should match SL Legacy Name exactly.**
~ALICIA STELLA or alicia stella may not work in some devices.
~Use copy/paste to be sure you have name exactly.
Use [this script](#) to learn your exact Legacy Name.

- o Also, in the ATM Server be sure you have a comma "," in between name and daily limit amount.

John Smith, 10000

Jane Smith, 5000
