
[Alicia Stella Design Store Open in YrGrid, the BitCoin-Based World](#)

Category : [Announcements](#)

Published by Alicia Stella on Sep-10-2015

You can now find Alicia Stella Design open in the virtual world of YrGrid! YrGrid is one of the fastest growing virtual worlds and the first to use Bitcoin as its currency.

It uses microBitcoins (uBTC) for in-world commerce, (which is worth one-millionth of a Bitcoin). Buying and selling currency is practically instantaneous and the world has a focus on gaming and fun activities you don't see much in Second Life anymore. I suggest you [create an account](#) and check it out if you haven't yet!

You can purchase Tip Jars, Tipping Server, Donation Boxes, Teleporters, Gadgets, and Sploders from [my store in YrGrid](#) as well as pick up over 50 free scripts including many exclusive to YrGrid!

And don't worry, this doesn't mean I am lessening my presence in Second Life in any way. I've had a presence in several other grids for years, but SL will always be my top priority. In fact, I have several new products coming out for my [main store](#) as well as new items for the [Scripts Store](#), [Sounds Store](#) and [Holiday Market!](#) So stay tuned in the coming months for new and exciting things!
